

# CLASSIC CAR CLEANING

See also [www.ashrose.com](http://www.ashrose.com) & [www.surfprep.co.uk](http://www.surfprep.co.uk) for more examples

The Ashrose Group specialise in using a low pressure sand jetting system that has been used nationwide for property restoration, including gaining approval for and subsequently working on many Listed Buildings.

Not only can the system clean industrial buildings, but uses have been found for cleaning metal and machinery.

As the low pressure jet has little effect on many plastics and rubbers, work can be carried out without removal or protection of electric cables or hydraulic pipes.

- The System Cleans Paint, Grime, Grease, Resins etc from Metal, Bricks, Stone, Wood and Plastics.
- Cleans Inside and Outside Environmentally Friendly, No Fumes or Toxic Waste
- Surface preparation to Sa 2.5 / WJ-1 (Blast profile Rz 40-60µm, roughness 12.5 to 15µm (ISO8503-1)) but thin Metals (such as car bodies) are not deformed nor work hardened by the working temperatures or low pressures.
- Low Consumption means less subsequent cleaning up
- Competitive Prices
- We also offer Zinga surface treatment, a pure zinc coating that outperforms hot dip galvanising
